King of Crops Internship

King of Crops is a new farm heading into its first growing season. We are transitioning a former nursery into an organically managed fruit and vegetable farm for King of Pops and the restaurant market in Atlanta. We aim to be a model for environmentally and financially sustainable practices while producing high quality, synthetic-free food.

This position offers an opportunity to experience first hand the development of an organic farm. Interns will learn the skills and knowledge required to start transplants, direct seed crops, cultivate fields, compost, identify and manage pests and weeds, harvest, wash and pack produce, and manage high-tunnel production. Marketing, financial management, and customer relations are also integral parts of running a successful farm that will be addressed during the internship.

We are also excited to cultivate responsibility and independence in our interns who will have the opportunity to focus on certain projects or aspects of farm production they find particularly interesting. This is a great opportunity to get your hands dirty, learn a lot, and have fun. We look forward to hearing from you!
