Salem Gardens Internship/Part time job

Salem Gardens is looking for a part time helper with 1/2 acre organic garden where we grow vegetables, fruit, and both medicinal and culinary herbs. Need help with all phases of gardening but especially with marketing to Athens Locally Grown. We're thinking of a student working on average 10 hours/week who can drive on their own out to our garden which is 20 minutes from the UGarden (on S. Milledge) in Oconee County near Farmington (3301 Salem Rd, Watkinsville, GA 30677). For us to take part in the Locally Grown program, we would need photos and quantities of crops that are available posted on their website on Sundays and then, if there are sales, the crops would need to be harvested, labeled, and delivered to their pickup site on Thursdays. In addition, we could use help with all the usual garden chores...

I'm thinking $10/hr if they are capable... and if they receive more than $600, then they will receive a Misc 1099 at the end of the year or we can pay them in cash... In other words, we are not set up to treat them as direct employees. I would assume they carry their own health insurance...

For details, please call Dennis Mason at 706-202-1212.
